

WHAT'S ALL THE EXCITEMENT ABOUT?

DNA VIBE®
REGENERATIVE WEARABLES

DNA Vibe's patented Jazz Band is far more than a super-cool patented regenerative wearable. It represents a new era in health & wellness, and your personal vitality.

The Chair of the National Foundation for Integrative Medicine, Department Chair of Medicine at Yale University, and Forbes Magazine's Chief Medical Editor have said "This will change everything."

DNA VIBE SCIENCE

Our patented tech stimulates Harmonic Excitation of the DNA molecule. This occurs when the wavelength of very low-level energy matches the recurring structural pattern of the DNA double helix (i.e., when they are in harmony).

Harmonic Excitation releases potential energy while stimulating a state change. This boosts the body's natural DNA-driven regenerative processes, while relaxing the DNA molecule so it's more available and engageable by the body.

DNA VIBE DIFFERENCES

Conventional light pads are nothing more than decorative LED strip lights - the exact same therapeutic effect as leaning against your car's brake lights.

ABSOLUTELY NO DIFFERENCE

REMARKABLY VERSATILE

Computer-optimized geometry allows the Jazz Band to comfortably contour to any area craving relief – neck, back, knees, elbows, ankles, hands, feet, and more! One versatile wearable for all your needs.

5,000+ clinical partners, pro athletes, teams and trainers, and 100,000+ happier Vibers trust their Jazz Band to help reduce the risk of injury, alleviate aches & pains, accelerate and improve recovery, while reducing anxiety and stress – with no drugs, shots, or surgeries.

Don't take it from us. A rapidly increasing number of experts agree: DNA Vibe's tech is different, and the differences matter.

OUR MISSION

To make the world a better place, one better life (and one better community*) at a time.

This commitment plus our confidence in our unique tech is why we offer a bullet-proof 60-Day Good Vibes Guarantee: It will help you or you'll get your money back.

*See how we're leading a manufacturing Renaissance

GETTING THE MOST OUT OF YOUR JAZZ BAND

15-20 min before strenuous activity to help boost performance & prevent injury.

20-30 min twice daily for 10+ days (as needed) for recovery from injury, surgery, or the daily grind. The more the better.

It's all about "occasions": Watching a 30-minute sitcom? go for 30 minutes; at the desk for an hour? go for an hour; 2-hour movie? go for 2 hours. This is why there are 3 convenient power options: 1) extended wall cord makes it easy to use at desk, on couch, in bed; 2) Wireless Power Pack for use on the go; 3) Car Power turns drive time into Vibe time.

Again, our Good Vibes Guarantee means it will help, or you get a full refund. DNA Vibe's got your back! (and neck, knees, elbows, ankles, hands, feet and more).

WAVES OF RELIEF

Wave 1: Immediate 'nerve gating' relief from randomized micro-vibration begins to sooth aches and pains upon 1st touch.

Wave 2: ~5 min – reduced stiffness and achiness from non-vascular fluid flows.

Wave 3: ~10 min – more decompression plus enhanced vitality through addition of blood flow & Oxygenation*.

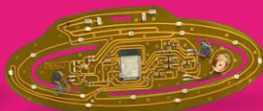

Wave 4: ~15 min – enhanced ATP further boosts vitality*.

**Unlike conventional light pads, these effects are non-thermal and without the undesirable consequences.*

DNA VIBE STANDS ALONE

Conventional

DNA Vibe

In sharp contrast, DNA Vibe's Jazz Band is a revolutionary patented technology that "will change health & wellness as we know it." Its highly sophisticated electronics are purpose-built to boost Harmonic Excitation (requiring minimum power & maximum precision). It's so advanced, it's 100% guaranteed to help.
